

I enjoy my satellite radio in my new car and so does my husband in his car. The traffic for the local NY area balances what the local stations say....I find it both helpful and useful. I resent the fact that lobbyists can deny me my right to choose what I want to listen to. Network radio stations are no longer a pleasure to listen to. I had stopped listening to the radio until I got the satellite radio. I choose the satellite radio for the quality and variety of the product....I choose to pay for it. I think that the FCC should reject the lobbyistswhat is the difference between satellite radio and cable TV services....we pay for quality and should have that choice....this is still America where we have choices.
